VEGETABLE PLANTS

P.D.FULWOOD TIFTON GEORGIA

1933

U.S. DEPARTMENT OF AGRICULTURE
BUREAU OF PLANT INDUSTRY
WASHINGTON, D. C.

The Fulwood Plantation, comprising more than 1200 acres of the very finest plant growing soil obtainable, is devoted solely to the growing of genuine Fulwood Vegetable Plants. At least some idea of this enormous acreage can be gained by the few fields shown on this page and on the outside front and back cover pages. The top picture on this page shows one of the irrigated fields.

FREE PLANTS

In order to increase my mailing list I will include with your order 50 extra Cabbage plants free of charge, if you will write below the correct names and addresses of your friends or neighbors. Each name must be the head of a family that regularly buys plants. Please write carefully and plainly, giving full address. No free plants will be sent for incorrect and carelessly written lists. The list must be sent with an order for plants.

REMARKS:

Here Is My Pledge To You

P. D. FULWOOD

I MAKE every effort to grow the finest, sturdiest, most healthy plants possible and spare no pains or expense to get them to you in this same condition. If I can obtain better seed, if I can find any method of growing these seed into better plants, or if I can evolve a more perfect packing and shipping plan than I am presently using, my pledge to you is that no time will be lost and no expense will be spared in making such improvements.

With more than twenty-four years of specialized experience in the growing and shipping of vegetable plants and with an ever constant endeavor to improve my plants and service in every way possible, I feel that I am in the best possible position to give you the very finest, most dependable products and service it is possible to give.

Back of these 1200 acres of exceptionally fine land is every facility to enable me to serve you best; such as complete mechanical equipment both in the fields and packing house, an old established organization of loyal, well trained assistants, ample financial resources so I do not have to skimp here and there in growing and marketing my products and

(See Special Garden Collections on Pages 11 and 14)

accordingly never have to yield to the temptation to buy cheap seed. Best of all, however, is the desire, and the **WILL** to serve you honestly and fairly in each and every transaction, to give you the finest plants and service possible, and to sell them to you at the lowest possible prices. My experience has proven that it costs less to sell an old previously satisfied customer than to sell a new one and therefore every shipment, regardless of how large or small, must be capable of holding the good-will of old customers or of making good-will with new customers.

MY GUARANTEE TO YOU

I positively guarantee all my plants to be exactly as described in this catalog. I guarantee them to be fresh, pure, genuine and unadulterated, and I guarantee them to be carefully selected, tested, and to be true to name. Any plants which may prove to be otherwise through possible error will be replaced free of charge.

Be sure the plants you buy are free of disease—be sure you obtain the exact variety you order—be sure your plants will produce a good full crop. You can't be sure of these things by ordering your plants from people you do not know to be reliable and who are soliciting your business in person or by advertisements with the bait of low prices—but you can be sure by ordering Fulwood's Plants.

Mr. Fulwood:

Send the plants in this order as good as those ordered last spring and there will be no kick coming. They were a No. 1 plants. All started right off to growing. We had onions 6 inches in diameter and tomatoes until after frost in November.

4/16/32

CHRISTIANA MONTGOMERY, Waldorf, Md.

Dear Mr. Fulwood:

Your plants did fine for me last year. The finest I ever raised and every plant made a head.

3/12/32

CLARENCE B. HEARN,
Farmington, Del.

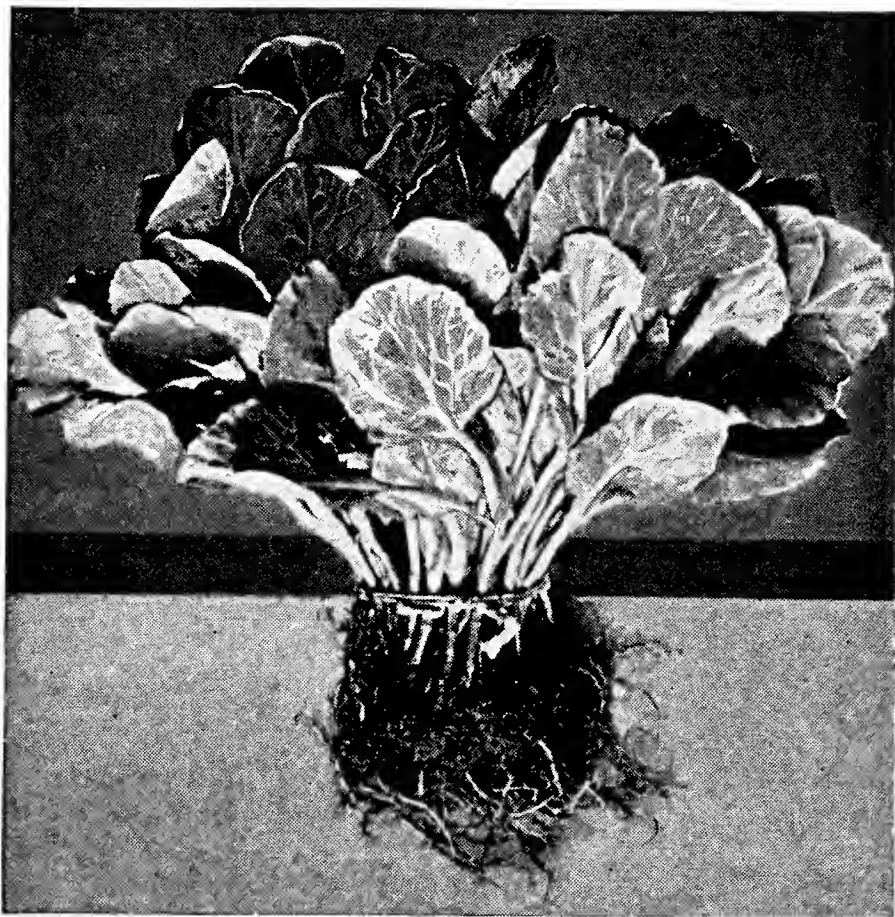

Dear Mr. Fulwood:

We have used your plants for five years and want to say they are the best we ever got.

3/18/32

J. EMMETT POTTER, Prairie Home. Mo.

(See Special Garden Collections on Pages 11 and 14)

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

Make from \$600.00 to \$1,000.00 per acre—quick money.

You can make real cash—and plenty of it in raising Cabbage from Fulwood's Genuine Frost-Proof Cabbage Plants. You can easily raise from six to ten tons per acre. Think of the profits you can make. Set out all the Cabbage you can, as early as possible in your locality, and you will be the man with money in the bank when your crop matures.

Vegetables sold early in the season bring many times the price of those marketed several weeks later. Fulwood's Genuine Frost-Proof Cabbage Plants produce full-grown heads from two to three weeks before home-grown plants—and that's why they are a real money-maker for the gardener.

(See Special Garden Collections on Pages 11 and 14)

Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy Cabbage plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight to ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot bed, or cold frame plants.

These Frost-Proof Cabbage plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 or 20 degrees.

Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crops—all ready for marketing during the time prices are highest.

Many unreliable growers are selling plants and are calling them "frost-proof." In many instances these growers are located where they do not have frosts during the growing period and therefore the plants they are offering have never been subjected to frosts. Where my plantation is located we have light frosts all through the winter growing season and as all of my plants are grown right out in the open fields, Mother Nature provides them with the strength and stamina to withstand cold temperatures. Be sure you buy genuine FROST-PROOF plants for a sure crop.

This year I have acre after acre of the finest Cabbage plants I have ever had. Climatic conditions have been perfect and they are in unusually fine condition, being tough and hardy and ready to start growing in your ground whenever you can plant them in your locality. I treat all my seed before planting to prevent disease and as further precautions, I change my lands each year and spray the plants often during cultivation.

Dear Mr. Fulwood:

I received 1000 sweet potato plants from you last year. They were sure fine. Never lost a plant, and they were good keepers. I have $\frac{1}{2}$ bushel at present, just as solid as when dug last fall.

3/18/32

R. O. COMBS, Judson, Ind.

Dear Sir:

I am very grateful in finding so excellent a plant company to deal with. Your plants arrived in outstanding conditions. I enjoy dealing with such a firm as yours.

4/25/32

E. D. BRAKEBILL, Bates City, Mo.

(See Special Garden Collections on Pages 11 and 14)

HOW TO GROW FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

To grow a good crop of Cabbage, I would advise selecting a deep sandy loam with a Southern exposure if possible. Apply broadcast from ten to fifteen loads of well rotted stable manure to the acre and plow in. The land should be harrowed thoroughly and rows laid off three to three and one-half feet apart. Apply about 500 pounds of high-grade fertilizer to the acre and mix well with the soil. If you have no stable manure, apply from ten to fifteen hundred pounds of fertilizer per acre, half broadcast and half in the drill. As Cabbage are gross-feeders, please bear in mind that you cannot fertilize them too heavily. The Wakefield, Copenhagen and Golden Acre varieties should be set out from fifteen to twenty inches apart, and other varieties from twenty-four to thirty inches apart. It is important to set the plants deep in the ground, up to the first leaf, in order to keep the stem from freezing and cracking, which will cause the plant to fall over and die. You can plant about twelve thousand plants of the Wakefields per acre and ten thousand of the flat head varieties per acre. The first cultivation should be deep, but when they start to head, cultivate them shallow and apply 200 pounds of nitrate of soda per acre.

Mr. Luellen Grew Ten Tons on Less Than One-third Acre of Land

Dear Sir:

I am enclosing a clipping from our county paper in regard to my cabbage crop grown from plants I ordered from you. I had fine success with your plants and had a fine crop of cabbage. I had about 3,000 plants of this one setting and cut about 20,000 pounds.

10/10/32

W. L. LUELLEN, Bethany, Mo.

Under the caption "Not Too Cheap," here is what the newspaper clipping said:

"Come out here a minute," said Warren Luellen as he drove up in front of the *Republican-Clipper* office Monday morning.

He pointed to two huge heads of fine cabbage on the bumpers of his automobile.

"People seem to think that my cabbage must have something the matter with it; that it's too cheap; that I wouldn't be selling it that cheap unless something was wrong." Luellen was advertising the cabbage at one cent a pound.

The two heads he pointed to were placed in our front window. Together, they weighed 26 pounds. If anything is wrong with them, something is wrong also with gold money, freedom, sunshine, rain and heaven.

(See Special Garden Collections on Pages 11 and 14)

VARIETIES OF FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best cabbage grown. Its merits are many, among which are medium heads for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker. See prices on page 7.

COPENHAGEN MARKET

A very fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few out leaves of an upright growth. My stock of this popular variety is extra early, uniform and dependable. See prices on page 7.

GOLDEN ACRE

This variety has the same general description as the Copenhagen Market—and in fact is a strain of that variety. Some growers prefer this variety which is priced the same as my other varieties. See prices on page 7.

SUCCESSION

The earliest of the flat-head varieties. A sure header and a very hardy grower both in cold and warm weather. This is grown very extensively in the South and gives universal satisfaction. Heads are of uniform shape, not too flat and exceptionally solid. See prices on page 7.

Dear Mr. Fulwood:

My onions and cabbage were fine last year. I got the best cabbage and onions around here. Onions average about one pound and this is 3,500 feet above sea level. No other plants for me but yours.

4/8/32

FRANK LEEWE, Fremont Center, N. Y.

(See Special Garden Collections on Pages 11 and 14)

CHARLESTON WAKEFIELD

This Cabbage is very much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a very desirable variety for shipping purposes as the heads are very solid and firm. It is a strong favorite with growers for a main crop. See prices below.

EARLY FLAT DUTCH

One of the oldest varieties. The head is very large and flat and very tender and fine grained. My strain of this Cabbage is of the very best to be had. It is excellent for a tonnage crop because of the very large heads. See prices below.

CABBAGE AND ONION PLANT PRICES

All Varieties at Same Prices

Fulwood's Genuine Frost-Proof Cabbage and Onion Plants are ready for shipment throughout the year except during the hot summer months. You can order them any time from September 1st until the following June 1st. All Cabbage plants are tied in bunches of 50 plants. Onion plants are in bunches of 100 plants.

Prices by parcelpost prepaid:

200 plants for	\$.50
500 plants for	\$1.00
1,000 plants for	\$1.75

Prices by Express or Mail—Charges collect:

500 plants for	60c
1,000 to 4,000 plants at rate of \$1.00 per 1,000	
5,000 plants and over at rate of \$.75 per 1,000	

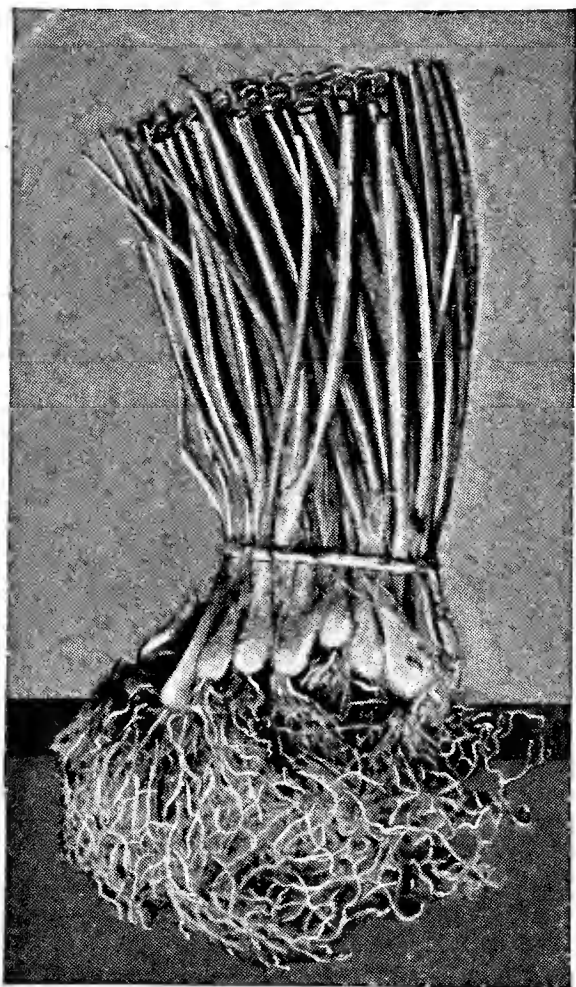

Dear Sir:

I received my cabbage and onion plants in fine shape and they are doing fine. Have had a pretty hard freeze since I set them out, but they are doing fine.

5/3/32

ROY WALKINSHAW, Rembrandt, Iowa.

(See Special Garden Collections on Pages 11 and 14)

FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

Like all Genuine Fulwood Vegetable Plants, my onion plants are grown, packed and shipped with the utmost care and precision. Plants are grown from the very finest seed I can obtain. All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand tem-

peratures as low as 18 to 20 degrees above zero without injury.

Onions grown from Fulwood's Genuine Frost-Proof Onion Plants are also an excellent money crop as they can be marketed at least two weeks in advance of onions grown from sets and way ahead of onions grown from seed. Furthermore, my plants will make much better onions than those grown from sets, the onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants and you can order them for shipment at the same time. Prices are the same as for Cabbage plants and I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire.

(See Special Garden Collections on Pages 11 and 14)

VARIETIES OF FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet mild flavor, like the Yellow Bermuda, this is an excellent eating onion.

SPANISH VALENCIA (or Sweet Spanish)

This variety can be grown in warm climates as successfully as the Bermuda varieties and much more successfully in Northern climates. This is a large globe-shaped brownish yellow onion of large size. The flesh is white, fine-grained, mild and sweet enough to be eaten like an apple. A good keeper and fine shipper when properly cured. Has been known to yield 1,200 bushels per acre.

ONION PLANT PRICES

Fulwood's Genuine Frost-Proof Onion Plants are ready for shipment any time from September 1st to June 1st following. All Onion plants are tied in bunches of 100 plants. Onion plants are priced the same as Cabbage plants, for all varieties, and should be set out the same time. I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire. See price list on page 7.

Dear Sir:

The 8,000 Bermuda onion plants withstood 10 degrees above zero weather.

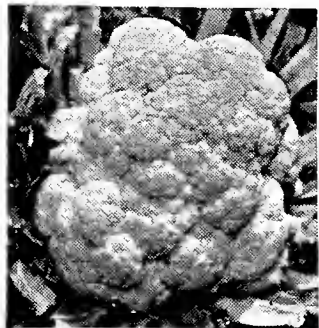

4/25/32

C. M. MILLER,
Candler, N. C.

(See Special Garden Collections on Pages 11 and 14)

OTHER FULWOOD'S GENUINE FROST-PROOF PLANTS

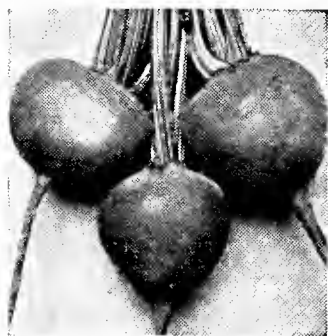

(Ready Sept. 1st Until June 1st)

FULWOOD'S GENUINE FROST- PROOF CAULIFLOWER PLANTS

SNOWBALL VARIETY

Why be satisfied with a later crop at ordinary prices when you can buy my plants and have an extra early crop which can be sold at top prices. The Snowball variety makes a large, perfect, sure header of excellent quality. Prices by parcel post, postpaid: 100 plants for 75c—500 plants for \$2.00—1,000 plants for \$3.00. Prices for shipment by express collect, any quantity, \$2.50 per 1,000 plants.

FULWOOD'S GENUINE FROST-PROOF BEET PLANTS

DETROIT DARK RED VARIETY

This is probably the most popular beet grown and I specialize in this one variety because it is the finest all around home garden and market beet and can be grown in all localities successfully. Have an extra early crop by ordering your beet plants from me. Prices same as for Cauliflower plants.

FULWOOD'S GENUINE FROST- PROOF LETTUCE PLANTS

ICEBERG VARIETY

Have this very finest variety of lettuce ready for market way ahead of lettuce planted from seed. I plant only this one dependable variety because of its quality and dependability as a sure cropper. Prices same as for Cauliflower plants.

(See Special Garden Collections on Pages 11 and 14)

(See Special Garden Collections on Pages 11 and 14)

FULWOOD'S SPRING PLANTS

(Not Frost-Proof) Ready April 1st to June 1st.

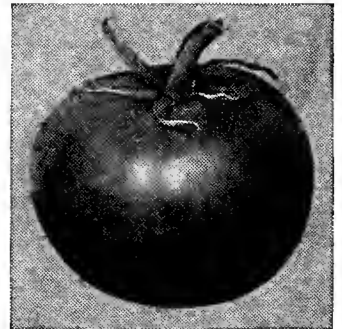

FULWOOD'S SWEET POTATO PLANTS PORTO RICO VARIETY

In my opinion this is the very best all-around Potato on the market. It is from two to three weeks earlier than any other yam. It is an enormous yielder and vigorous grower. Its flesh is red and very sweet with unsurpassed eating qualities. This particular variety has been quite well introduced into the northern markets within recent years and curing houses are paying more for it than any other. A fine keeper. During most years there is a shortage of good plants of this variety and I advise sending in your orders as early as possible for shipment at any time you may specify. All orders will be shipped in the order in which they are received. Prices by parcel post prepaid: 500 plants for **\$1.25**; 1,000 plants for **\$2.25**. Prices by express not prepaid: 1,000 plants to 4,000 plants at **\$1.50** per 1,000; 5,000 plants to 9,000 plants at **\$1.25** per 1,000; 10,000 plants and over at **\$1.00** per 1,000.

FULWOOD'S TOMATO PLANTS

**VARIETIES: GREATER BALTIMORE,
MARGLOBE AND BONNIE BEST**

I ship more Tomato plants than any other grower, shipping them by the millions to practically every state in the Union to both large and small canning factories, truck farmers, gardeners and to individuals who grow tomatoes for their own use. I have developed these varieties to a very high state and my plants are exceptionally well rooted, large and stocky. They are all open-field grown and are acclimated to outside temperatures and will

(See Special Garden Collections on Pages 11 and 14)

start growing quickly and produce rich, red ripe tomatoes much earlier and more surely than home-grown plants. Tomato plants are not frost-proof, however, and should not be ordered shipped until all danger of killing frost is past. My Tomato plants are not perishable and when packed as I pack them in deep, damp moss they will keep in good condition for several days. Order Bonnie Best for early market and home garden use. The Marglobe is wilt resistant and the fruit is of medium size, solid, good color and good shipper and will make a fine main crop. The Greater Baltimore variety is a mid-season tomato and is used more by canners than any other, producing a very heavy crop of large solid tomatoes and a sure cropper. *Prices by parcel post prepaid*: 100 plants for **35c**; 500 plants for **\$1.50**; 1,000 plants for **\$2.25**. *Prices by express collect*: 1,000 plants to 4,000 plants at **\$1.50** per 1,000; 5,000 plants to 9,000 plants at **\$1.25** per 1,000; 10,000 plants or over at **\$1.00** per 1,000.

FULWOOD'S PEPPER PLANTS

VARIETIES: WORLD BEATER AND RUBY KING

Both of these varieties are exceptionally sweet and mild, are good shippers and vigorous growers. Set out a quantity of either or both of these varieties and have peppers on the market much earlier than peppers grown from seed. These plants are full bodied and strong and you'll be much more sure of a full crop than if you depend upon growing from seed. *Prices by parcel post, prepaid*: 100 plants for **75c**; 500 plants for **\$2.00**; 1,000 plants for **\$3.00**. *Prices by Express Collect*: **\$2.50** per 1,000 for any quantity.

FULWOOD'S HOT PEPPER PLANTS

Long Red Cayenne Variety: Price by parcel post, postpaid; **50c** per dozen plants. Write for prices on larger lots.

Dear Sir:

Shipment of plants just arrived, came through in perfect shape. The wet moss in bottom of crate keeps the plants fresh, and as plants were not too large, and were no doubt shipped as soon as pulled, the shipment was entirely satisfactory.
4/16/32

MERRICK HDWE. & FURNITURE, Buhl, Idaho.

(See Special Garden Collections on Pages 11 and 14)

FULWOOD'S EGGPLANT PLANTS

BLACK BEAUTY VARIETY

I specialize on this one variety because of its many merits. It holds its color exceptionally well, grows very large, has good shape and is of unusually good quality. The

Black Beauty variety is naturally early and if you'll grow it from my fine plants your crop will be just that much earlier. *Prices by parcel post, postpaid:* 100 plants for 75c; 500 plants for \$2.00; 1,000 plants for \$3.00. *Prices by Express Collect:* \$2.50 per 1,000 plants in any quantity.

I reserve the right to substitute some other good variety for any plants listed which I may be out of at the time your order is received. I believe I'll have ample plants of all kinds to fill all collection orders as listed.

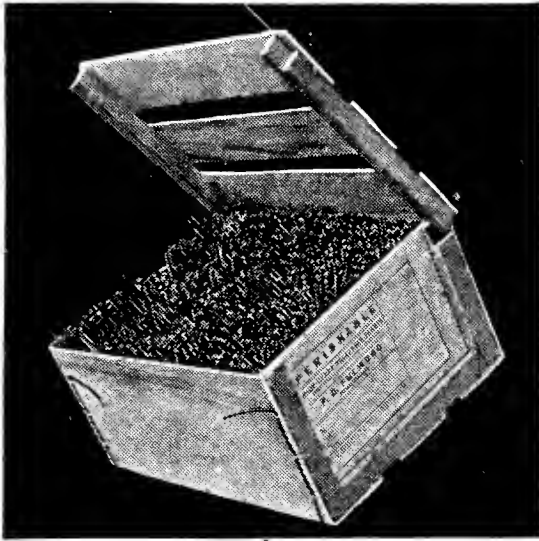

Dear Sir:

The plants you have sent thus far have been very satisfactory. Every one says they are the best plants that are shipped to Rector. I am thinking that by next year we can build up a good trade.

CLINT LYLES, Rector, Ark.

(See Special Garden Collections on Pages 11 and 14)

HOW FULWOOD'S PLANTS ARE PACKED

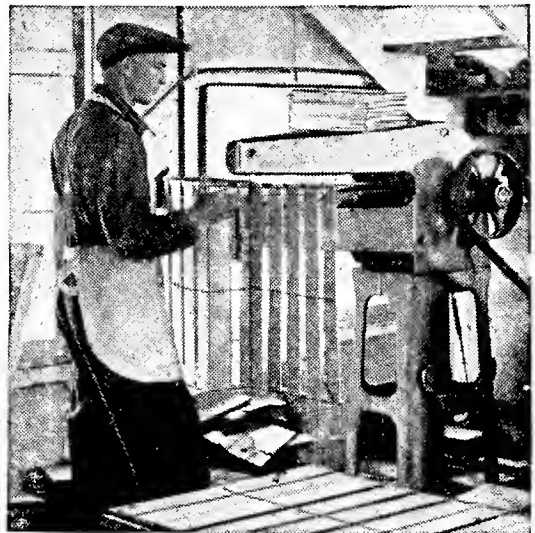

ONION PLANTS IN CRATE

CABBAGE PLANTS IN CRATE

After I have grown the very finest plants possible to grow, it would be right down foolishness to pack and ship them in any manner whereby I would run the slightest chance of their not reaching you in perfect condition, I have perfected my packing and shipping methods to the point where I can fully guarantee all my plants will arrive at destination in perfect condition for planting. All plants are pulled, sorted, counted, bundled, packed, crated and shipped, all on the same day. This insures maximum freshness at the time of shipping. All shipments are made on the same day orders are received, except when unusually bad weather prohibits getting into the fields for a day or two. I could pull my plants several days ahead and keep them in cold storage, as some plant growers do, but such methods would prohibit my iron-bound guarantee of all plants arriving in perfect condition.

My twenty-four years of experience has taught me much about sorting, bundling, packing and crating and when your plants arrive you'll have a good full count—they'll be correctly packed

ASSEMBLY OF CRATES

(See Special Garden Collections on Pages 11 and 14)

in light-weight wire bound, strong, well ventilated crates and there will be no runts or damaged plants. My shipping crates are assembled right here with my own machinery. I have designed the correct kind of crates for each plant and all shipments will arrive at destination with crates and contents intact.

The kind of plants, the season of the year, and other factors to be considered, determine whether the roots of the plants shall, or shall not be packed in damp moss and wrapped in waxed paper. Such packing is not always advisable and inasmuch as I guarantee my plants to arrive in perfect condition I reserve the right to select the most proper method of packing at the time shipments are made.

All Genuine Fulwood plants are perfectly produced and shipped—they are priced exceptionally low, especially for plants of such high quality—they will produce vegetables of the very highest quality at the very earliest possible time. Place your plant orders where you can obtain such dependable service from a really responsible grower.

Tear out one of the order blanks in this catalog, fill it in carefully being sure to write your name and address plainly and mail it to me with your remittance and you'll receive the finest plant satisfaction you've ever received. You'll be notified by mail the day your plants are shipped.
